KLM 2601

Simplicity with sophisticated style

Certifications & Awards

KLM 2601 is an ideal fully automated beans-to-cup machine for small office use. Designed to grind 7-14 grammage of coffee beans per shot, its compact size does not compromise the fragrance of coffee brew. The sleek exterior of **KLM 2601**, chrome plated bean container, clear and symmetrical designs will go well with modern office outlook. This will definitely serve as a highly functional accessory to add a sophisticated touch to your home and office.

Cleaning

KLM 2601 is designed to be highly functional, and easy to be cared for. Built-in with one touch cleaning function, it is highly user friendly. The cleaning and maintenance programmes require little effort to maintain, **KLM 2601** notification technology will prompt cleaning message to ensure the hygiene of the machine

Customisation

Kalerm provides wide selection of accessories to go well with **KLM 2601** to fit different user requirements. The machine also allows customisation of each cup of beverage, with the navigation function of coffee strength and milk/cream dispensing time
